- ▶ Eth: 1 x 10/100Base-TX
- Serial Port: 1 x RS232/422/485 all in one (RJ45 Type)
- Antenna Socket: (A) LTE (B) GPS (C) LTE
- Reset: Press for 7 seconds to restore default setting
- Single SIM
- SD Card
- ▶ DI/DO: 1DI + 1DO

Package Check List

- JetWave 2111/2411 Product Unit
- > 2x LTE Antenna
- ▶ 6-pin terminal block x 2
- Quick Installation Guide
- Din-Rail Kit
- ▶ RJ45 to DB9 connecter

Installation

Power Input

The device supports dual DC power input. The typical power input is 9~30VDC.

Power the unit

- Connect the power, the unit will power on .
- When the unit is ready, the PWR LED turns Green.

Operating Temperature

-40 ~ 70°C

▲ Notice

Mounting The Unit/Antenna and well Ground is Must: JetWave 2111 series supports Din-Rail mounting, the mounting kit is preinstalled. You can mount the device to the DIN Rail directly. Connect the Ethernet cable, Antenna and Ground before power on system. Ground is important and

Grounding

MUST in field.

\wedge Warning

- The DC connecting line must conform to the safety regulations of the country in which the device is installed.
- Properly connect the device to a protective conductor.

Web GUI

The JetWave 2111 series provides web management interface for basic and advanced settings. Before configuration, please make sure your system meets the following requirements:

- A computer coupled with 10/100/1000 Base-T(X) adapter.
- Configure the computer with a static IP address of 192.168.10.X (X cannot be 0, 1, or 255).
- Connect JetWave 2111 series to Eth 1 by standard Ethernet cable. The Eth 1 LED turns Green means the link is activated.
- The Ethernet default IP is "192.168.10.1"
- > Open web browser (Ex: IE, Chrome, Firefox...) and enter the IP address of the product. You will see the System Login page.
- Check User Manual for advanced settings.
- Please access to the web interface via https://, if the web browser is not access, please check your firewall or contact your support window for further help.
- Note: If you forget the IP Address, you can use Korenix View Utility to search the device's IP address, the program can be found at Download page of the Korenix website.

Korenix View Utility

The Korenix View Utility provides you a convenient way to scan the network and configure the connected Korenix device.

Step 1: Open the Korenix View Utility. (V1.7 or later version) Step 2: Select the correct NIC (Network Interface Card) from the NIC list Step 3: Click "Discovery", and then the Nodes and its IP address can be found and listed in the Node list.
